Change data

Step 1: Load packages

```
install.packages("tidyverse")
## Installing package into '/cloud/lib/x86_64-pc-linux-gnu-library/4.0'
## (as 'lib' is unspecified)
install.packages("skimr")
## Installing package into '/cloud/lib/x86_64-pc-linux-gnu-library/4.0'
## (as 'lib' is unspecified)
install.packages("janitor")
## Installing package into '/cloud/lib/x86_64-pc-linux-gnu-library/4.0'
## (as 'lib' is unspecified)
Once a package is installed, you can load it by running the library() function with the package name inside
the parentheses:
library(tidyverse)
                                                 ----- tidyverse 1.3.2 --v ggplot2 3.3.5
## -- Attaching packages -----
## v tibble 3.1.8
                    v dplyr
                                1.1.0
## v tidyr
           1.3.0
                     v stringr 1.5.0
## v readr
           2.1.3
                     v forcats 0.5.1-- Conflicts -----
## x dplyr::filter() masks stats::filter()
## x dplyr::lag()
                     masks stats::lag()
library(skimr)
library(janitor)
##
## Attaching package: 'janitor'
## The following objects are masked from 'package:stats':
##
##
       chisq.test, fisher.test
Step 2: Import data
hotel_bookings <- read_csv("hotel_bookings.csv")</pre>
```

```
hotel_bookings <- read_csv("hotel_bookings.csv")

## Rows: 119390 Columns: 32-- Column specification ------

## Delimiter: ","

## chr (13): hotel, arrival_date_month, meal, country, market_segment, distrib...

## dbl (18): is_canceled, lead_time, arrival_date_year, arrival_date_week_numb...

## date (1): reservation_status_date

## i Use `spec()` to retrieve the full column specification for this data.

## i Specify the column types or set `show_col_types = FALSE` to quiet this message.
```

Step 3: Check data

\$ total_of_special_requests

\$ reservation_status

```
head(hotel_bookings)
## # A tibble: 6 x 32
                   is_ca~1 lead_~2 arriv~3 arriv~4 arriv~5 arriv~6 stays~7 stays~8 adults
        <chr>>
                         <dbl>
                                      <dbl>
                                                    <dbl> <chr>
                                                                               <dbl>
                                                                                             <dbl>
                                                                                                           <dbl>
                                                                                                                        <dbl>
